

Crabbes Creek Public School

Works notification

4 November 2022

School Infrastructure NSW and Public Works are managing the repair and remediation of buildings and grounds at Crabbes Creek Public School that were damaged by flood waters in March 2022.

Raising Block B to start at Crabbes Creek Public School

Lifting of Block B has commenced at Crabbes Creek Public School and the contractor is currently working on building the subfloor. Concrete pouring of footings for the new piers into the subfloor will commence **Wednesday 9 November to Wednesday 16 November**. Work hours will be from **7am to 5pm Monday to Saturday**.

Due to a lack of space on school grounds, the concrete pump required to pour the footings will be partially located on Crabbes Creek Road, outside the building compound site entry.

Exclusion zones around works areas will be established as per map below.

Legend

— Exclusion zone

Traffic management

As the concrete pump will be located on Crabbes Creek Road, there will be minor disruption to traffic and pedestrian flow. Traffic management will be in place to guide vehicle, bicycle, and pedestrian movement.

The health, safety, and wellbeing of the school and the local community is our highest priority. Thank you for your cooperation during this important work.
