

Maclean High School

Project Update | April 2023

What is happening at Maclean High School

A project to deliver remediation and repair works to Maclean High School after it was damaged by floods in early 2022, is progressing well. Working closely with the school, we are delivering refurbished and flexible learning environments, and core facilities that will support the long-term needs of the local community. In addition to refurbishing and remediating flood damaged areas of the school, we are simultaneously delivering planned maintenance works to streamline works and minimise disruption on the school community.

Current Status

- Agricultural facilities and buildings exposed to flood waters have undergone deep cleaning and mould remediation. Mould remediation elsewhere in low lying areas is complete and a school wide storm water drainage system is being upgraded to ensure adequate drainage for the replaced roofs on Blocks L, A, B & C.
- The internal dirt road leading to the agricultural fields will be excavated and resurfaced commencing in Term 1, with upgraded drainage to improve the direction of waterflow.
- A new multipurpose sports court is being built to replace the flood damaged court. It will be covered with a new COLA under the Regional Renewal Program, which is also funding an extension to the gymnasium and concrete tiered seating.
- A new roof was installed on the library (by Planned Maintenance)

Next Steps

Under planned maintenance, new roofs are also being installed onto Blocks A, B, and C. New windows and façades will be installed on A & B Blocks for better ventilation, and all classrooms and movement areas in Blocks A, B & C will have new carpet and painting. Under the Integration Program, the school is receiving a new lift and walkway.

Undertaking simultaneous works, along with materials and workforce supply delays, has extended the early forecast project completion. The combined planned maintenance works and flood related works are now due for completion in early Term 3. We will work to deliver these projects as soon as possible and keep the school community informed throughout the delivery of the works. We thank you for your patience during works.
