

# Maclean High School

## Works notification

1 September, 2022

School Infrastructure and Public Works are managing the repair and remediation of buildings and grounds at Maclean High School that were damaged by flooding in March.

Maintenance and upgrade works are also planned for Maclean High School buildings and grounds over coming months.

### Site establishment

To allow the first stage of work to begin, a contractor site compound will be established near the school sports court.

On September 5-7 temporary fencing will be installed around the compound to separate all work areas and ensure the safety of students, staff and visitors.

Contractor site buildings are scheduled to be delivered to the school on September 12. Traffic management will be in place along Cameron Street while the site office is being delivered.

### Contractor entry and parking

Contractors and deliveries will enter the site through a designated entry, using the existing access road from Cameron Street to the lower part of the school (next to the gym).

Parking will be provided for workers to minimise disruption to staff, students and neighbouring streets.

A truck parking area has been designated in the school car park to allow for the delivery of material to the school with minimal disruption.

### Work hours during construction

Standard working hours will be 7am to 5pm, Monday to Saturday.

No work will take place on Sundays or public holidays, however, if there's a need outside these hours (e.g. safely remediating contaminated materials), the community will be notified.

Neighbours and the community will be notified ahead of time of any work that has the potential to impact on neighbouring roads.

### How will the school and local community be kept safe during construction?

School Infrastructure NSW will continue to share information with the Maclean High School community as work progresses, through our website and regular updates to the school.

All work will be undertaken in accordance with SafeWork NSW regulation. All construction impacts will be controlled in accordance with the relevant management plans. The health and safety of the school and community are our highest priority.
